

Bryan W. Barnhill

VP, Technical and Operational Support

Bryan, VP, Technical and Operational Support, leads the analysts and technical teams that support our payer and provider relationships. Additionally, as part of our Provider Service and Support management team, Bryan ensures RealMed's client service organization delivers efficient, effective and accurate solutions to our partners.

Bryan, who joined RealMed in 2000, has more than 15 years of information technology experience. He served as a Technical Project Manager at Cybertek, where he managed software implementations for the company's largest clients in the financial services industry, including Chase, ABN-Amro, and Astoria Federal Savings. He also provided IT services and support for national and international clients in health care, chemical and industrial manufacturing industries as a Senior Systems Engineer while at XeroxConnect.

Brian holds a degree in Computer Technology from Purdue University and is an active board member of an Indianapolis-based, non-profit organization which conducts fundraisers for under-privileged youth both locally and abroad.
